Barrel

Design Narrative

Artist Background:

My personal connection to the neighborhood and park is I have proposal to LEAP/ The City of Lansing a few years ago my ideas. My idea was to revitalize Foster Park with a garden maze and walking paths as place-marker with the City Of Lansing. I'm interested in creating a public art project on Lansing's Eastside because it's my gift to share my talent as an artist/ place-maker to my community.

Artist Statement:

My concept design is titled UNITY as I try to define it visually. It reflects the neighborhood's identity and park assets by neighbors and friends getting together at Foster Park for events and varies actives in a diversity community. I have based my design assuming the community is a loving and proud of its diversity and culture, working onward for peace and joy for all people in the communities and the world.

Project Information

Artist Listing: Jerry Smith

Title: Unity

Description:

“Unity”- My drawing of the two women with their hands up carrying a large flowerpot. The flowerpot will have fake flowers with couple hugging (Black Live Matter). Art will have LED lights to enhance the Up-lifting figures holding the flowerpot together. Communities, visitors and bus riders are able to engage and have an experience with an artistic transit shelter while waiting for bus rout 15.

The Art**Materials:**

Black powder coated aluminum custom frame, Color coated powder design laser cut panels, LED light and hardware.

Site Plan, Materials and Installation:

16.7” X 10” 307.2 sq ft of concrete, Aluminum shelter with Tempered glass, Solar panel/ LED Light, 1 sets of 40 ft multi color garden LED lights, water resistant glue, and hardware.

Installation:

CATA will decide who will install the transit shelter and art, lights with solar panel devices. I will be present doing all art installations with CATA and sub-contractors.

Shelter Specifications:

5 X 10’ three sided; full side wall with open front; Traffic black aluminum structure, 3/8” Tempered clear glass, LED strip lighting, hardware, barrel roof with bronze acrylic glazing, Low profile flexible solar panel and header mounted battery box, Eclipse silver gray bench 6’, solar powered dual slot USB charging port.

Maintenance:

The shelter's lighting is solar panel operational with battery box and replacing breaking tempered glass.
